Overview of NHI's Information Systems

Information Systems of NHI

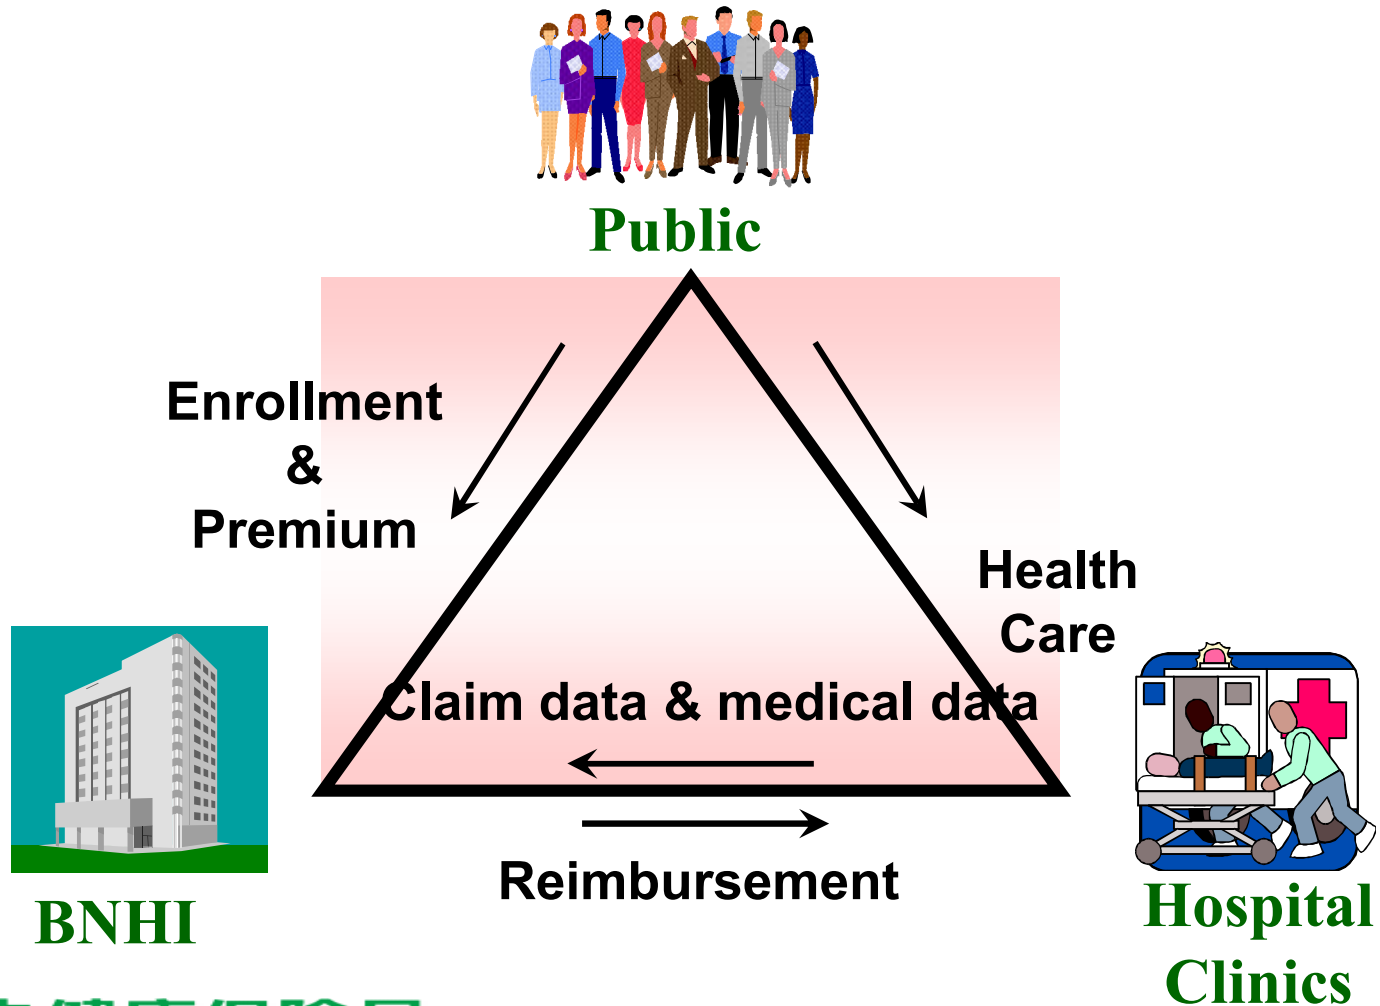

Data Profile

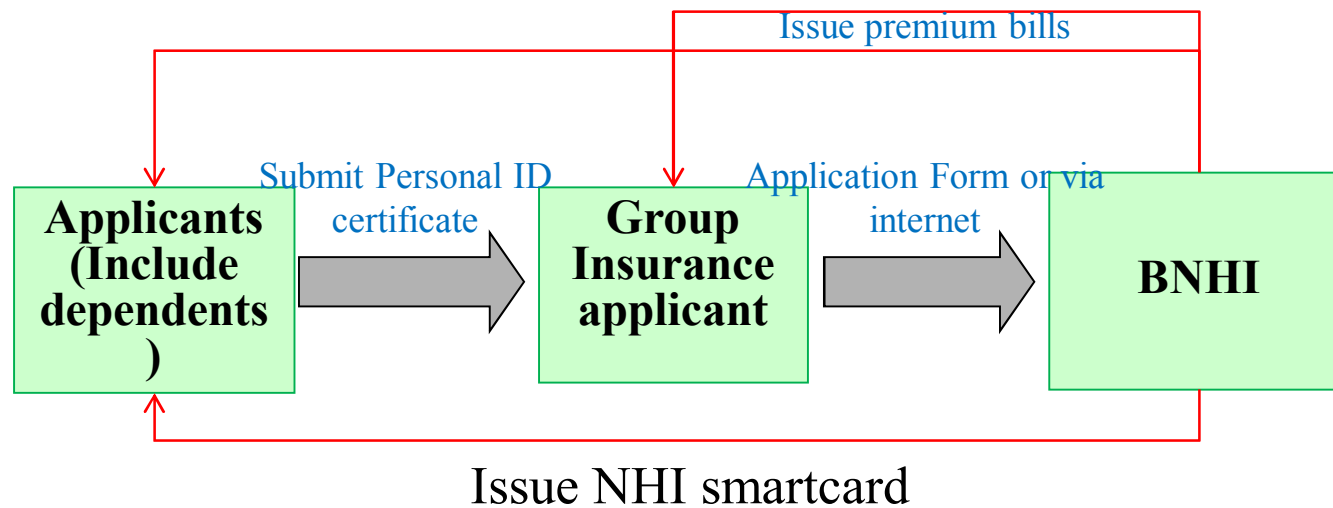

- THE NUMBER OF GROUP INSURANCE APPLICANTS : **more than 700,000**
- THE NUMBER OF BENEFICIARIES : **23 million**
the rate of transactions per month : **8%-10%**
- THE NUMBER OF CLAIMS FOR OUTPATIENT TREATMENT PER MONTH : **28 million**
the number of medical orders per month : **more than 116 million**
- THE NUMBER OF CLAIMS FOR INPATIENT TREATMENT PER MONTH : **257,000**
the number of medical orders per month : **16 million**
- THE NUMBER OF PHARMACY CLAIMS PER MONTH : **5 million**
the number of prescription records per month : **more than 16 million**

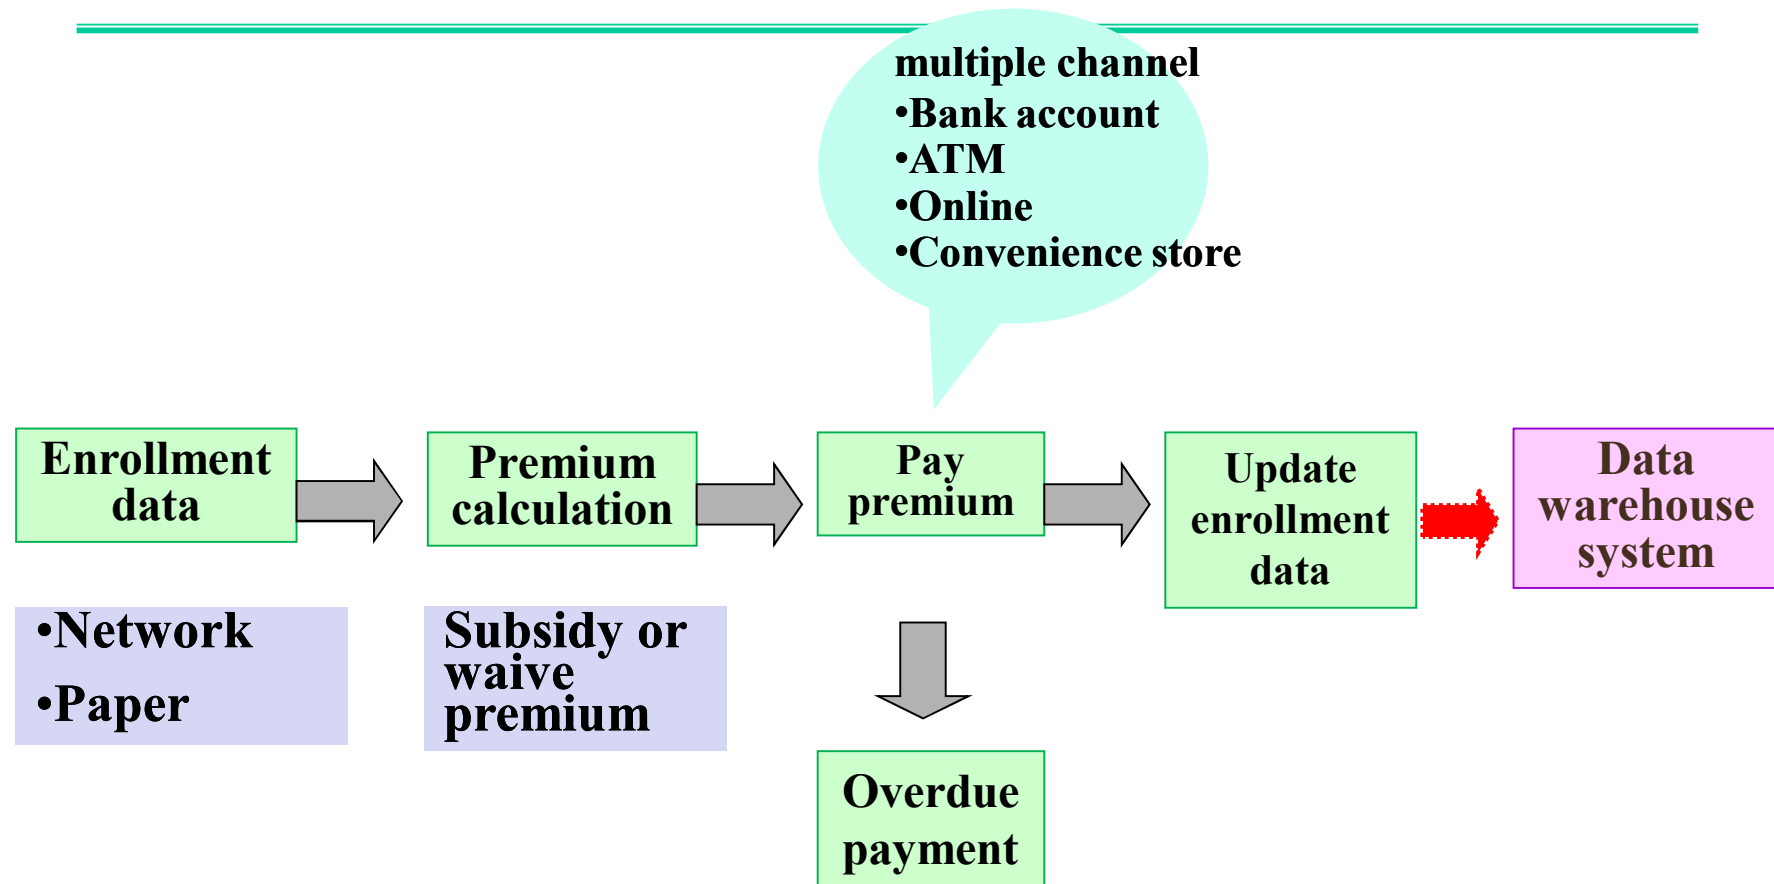

NHI Data Flow

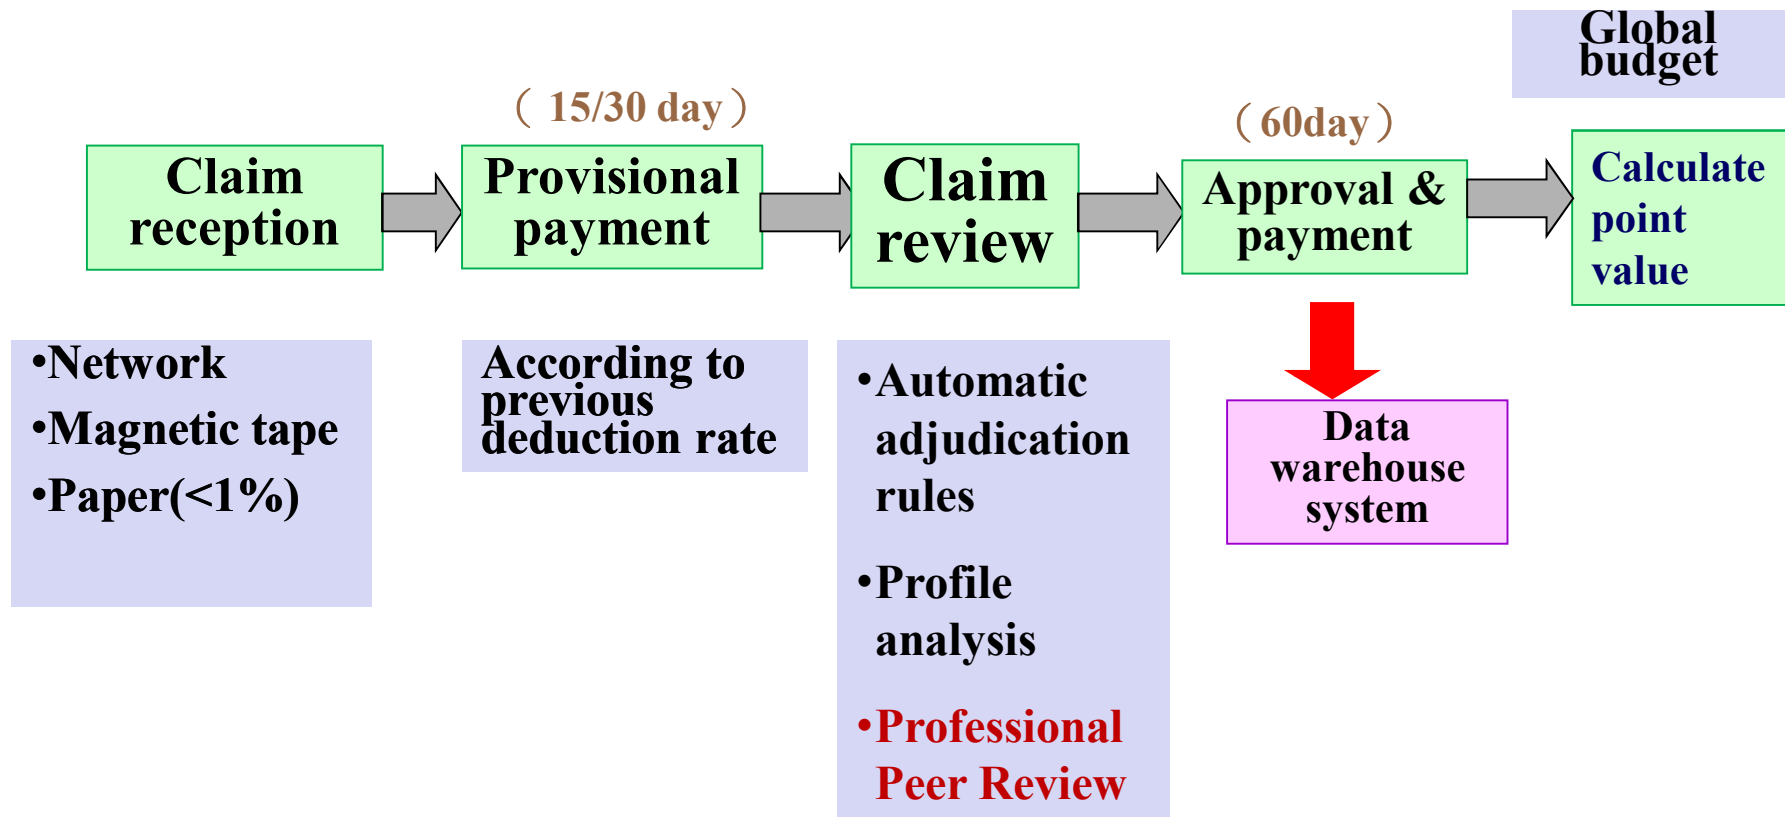

Enrollment Data Flow (I)

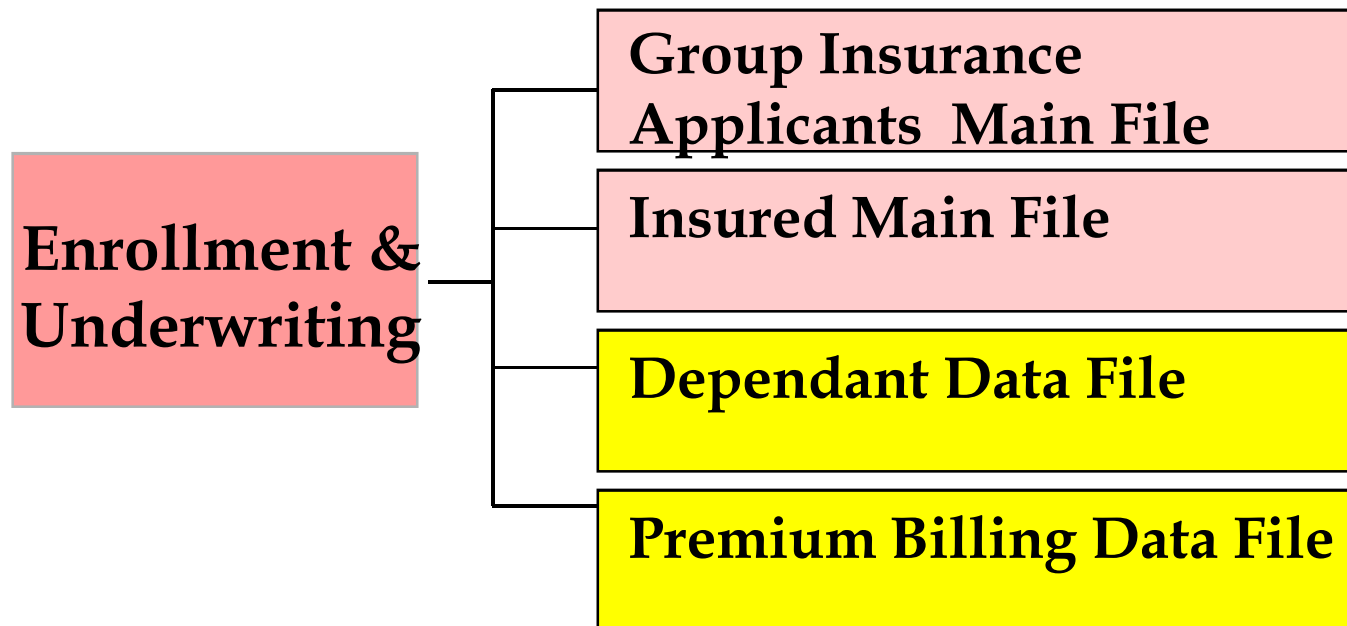

Enrollment Data Flow(II)

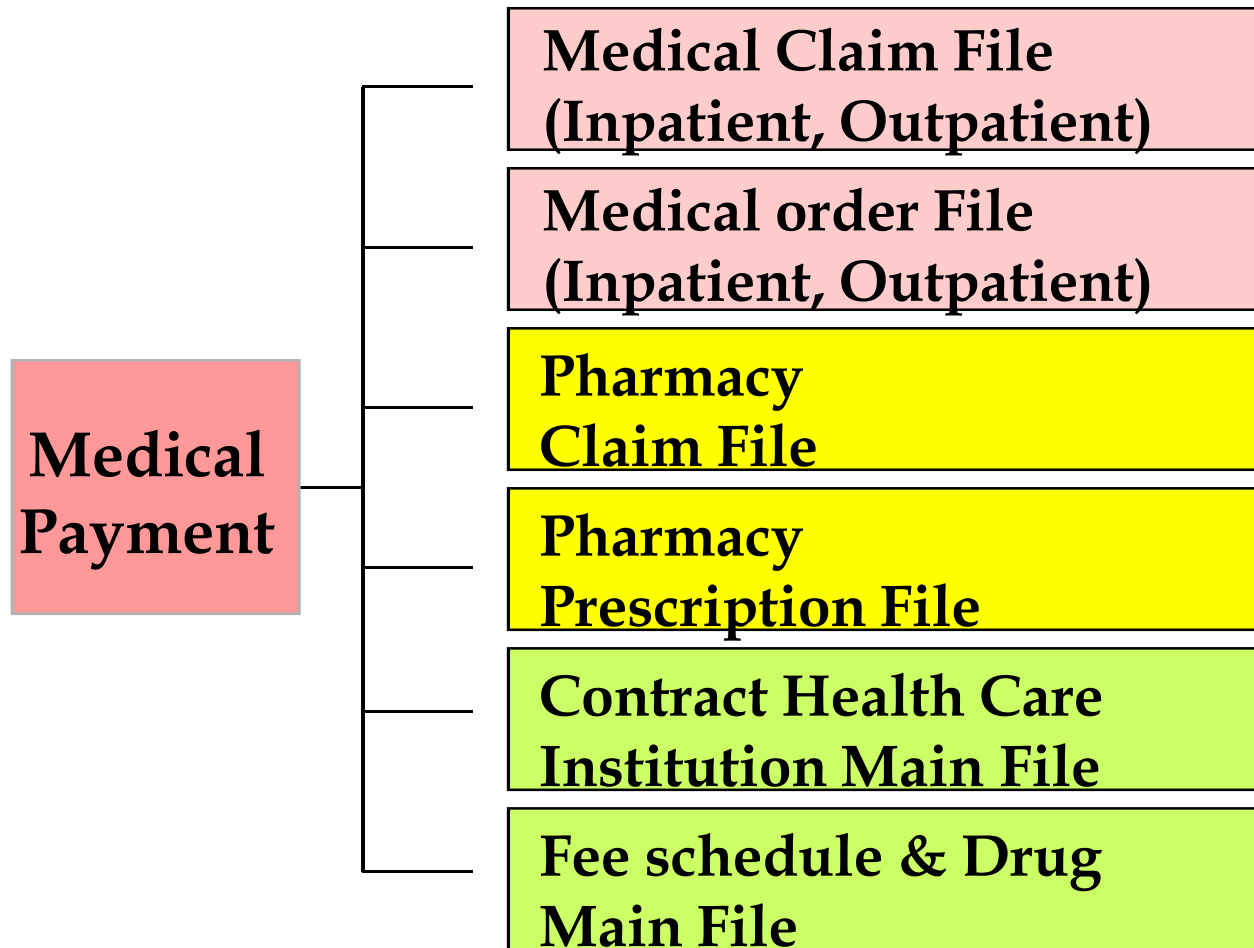

Claim Data Flow

Enrollment Database

Medical Database

Medical Data Collection Method

Data Collection Strategy

- **Single-payer payment system**
- **Unified claim form**
- **Standard coding table**
- **Set time table for hospitals to move to electronic claim**
- **Fast payment remittance for electronic claim**
- **Provide incentives to promote computerization**

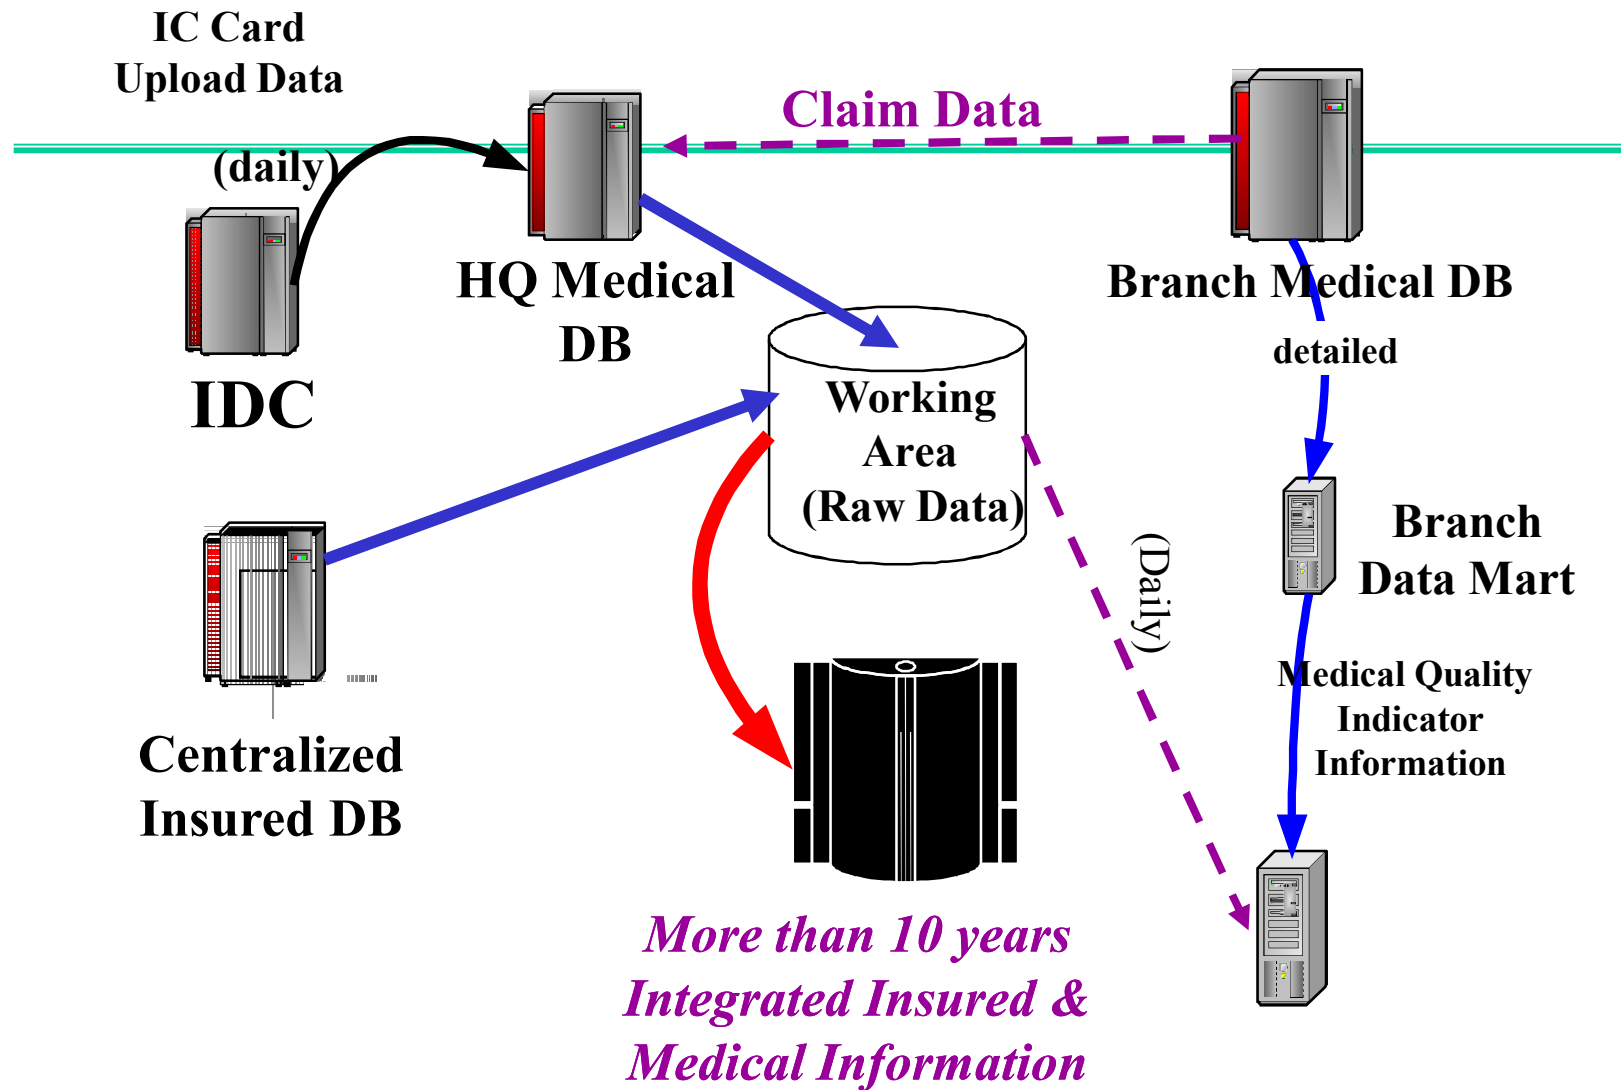

Electronic Medical Claims

The Rate of Claims through Electronic Media

Data Warehouse System

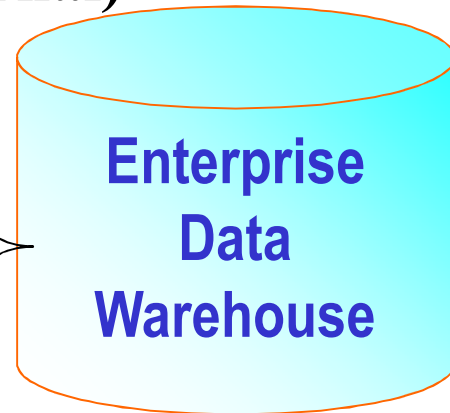

Data Warehouse data flows

Data Warehouse Supports

Dynamic Analysis(internal)

- Ad_hoc Query
- Pre-defined Query (ISGS)
- Data mining (experimental)

Nationwide Profile Analysis (internal)

- Utilization Analysis By- specific medical order
- Utilization Analysis By- specific Disease
- Utilization Analysis By- patient
- Provider Profile

Healthcare Smart Card

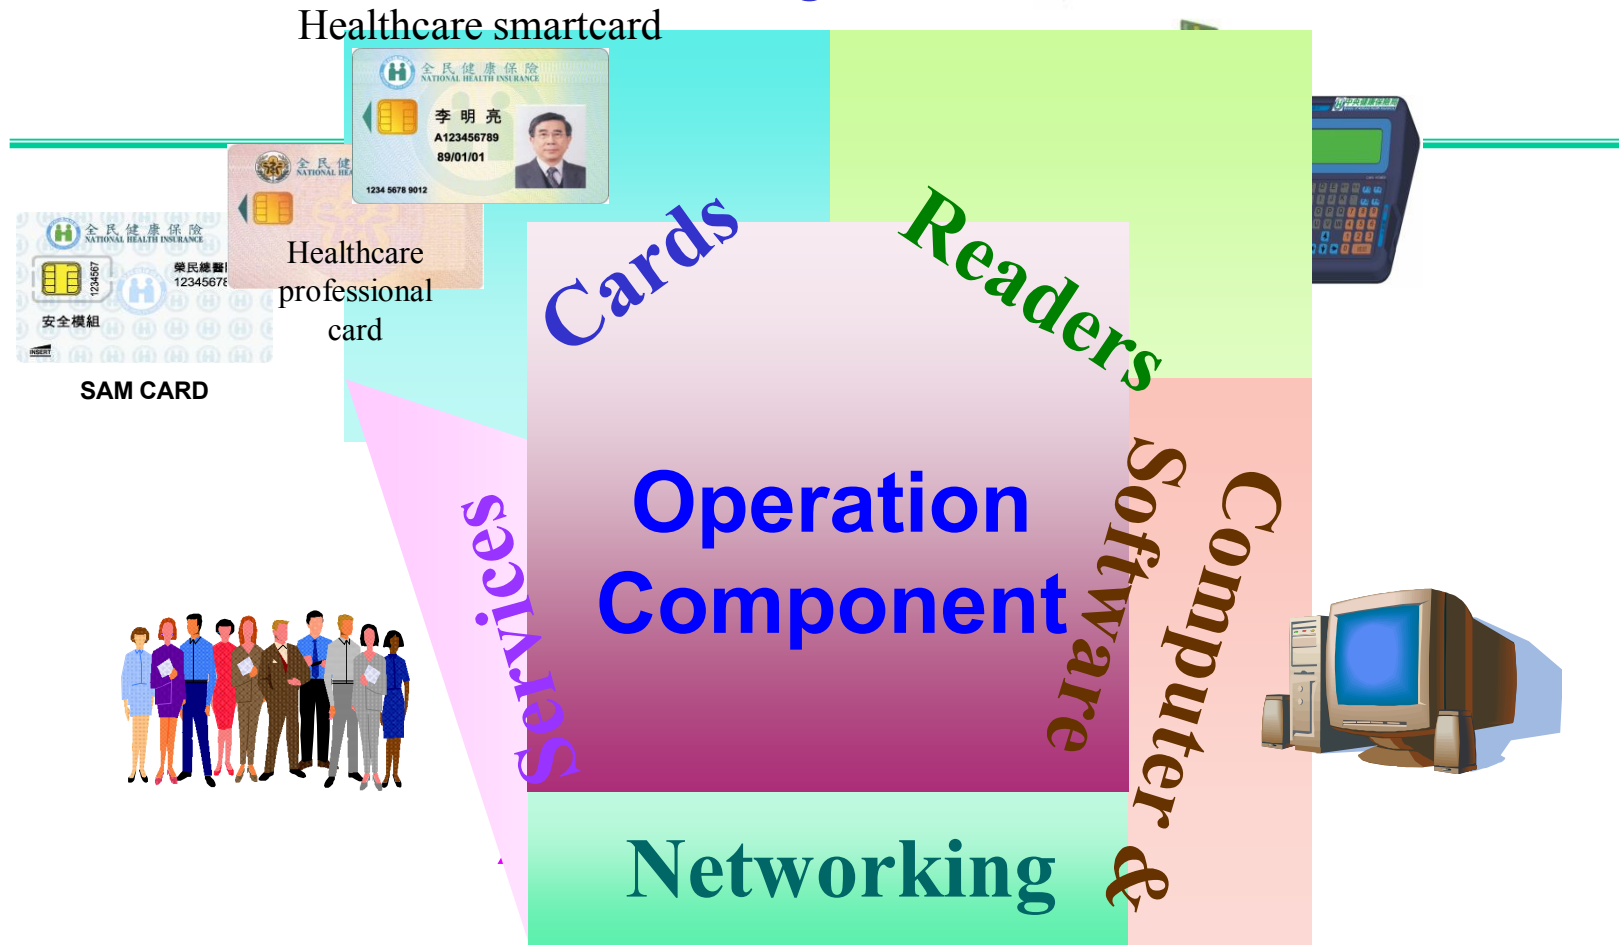

Goal of NHI Smart Card

- **Merge multiple paper cards into one**
- **Provide convenient card refresh service to people**
- **Real time check up patient's premium paid status**
- **Provide timely information on “where and when” patient received services**
 - **Validate utilization status at point of service to prevent fraud**
 - **Offer medical visits tracing function on those suspected communicable disease infection people**
- **Promote hospitals and clinics to further computerize and upgrade to on-line operation**

Project Overview

- **Issuing**
 - 24M smart cards (to insured)
 - 300K reader SAM cards (to hospitals & clinics)
 - 16K card readers (to hospitals & clinics)
- **Consulting (call center) services**
- **Implementing Internal H/W, S/W, AP and Data Processing Center (IDC)**
- **Provide API for Hospital Information System developing**
- **Training courses for hospitals end users.**
- **Total Budget – NTD 3.7 Billion(USD 120 Million)**
- **Formally implemented in Jan. 2004 (running for over 6 years!)**

Project Infrastructure

Healthcare Card

Basic data section
Insurance data section
Medical care data section
Public health data section

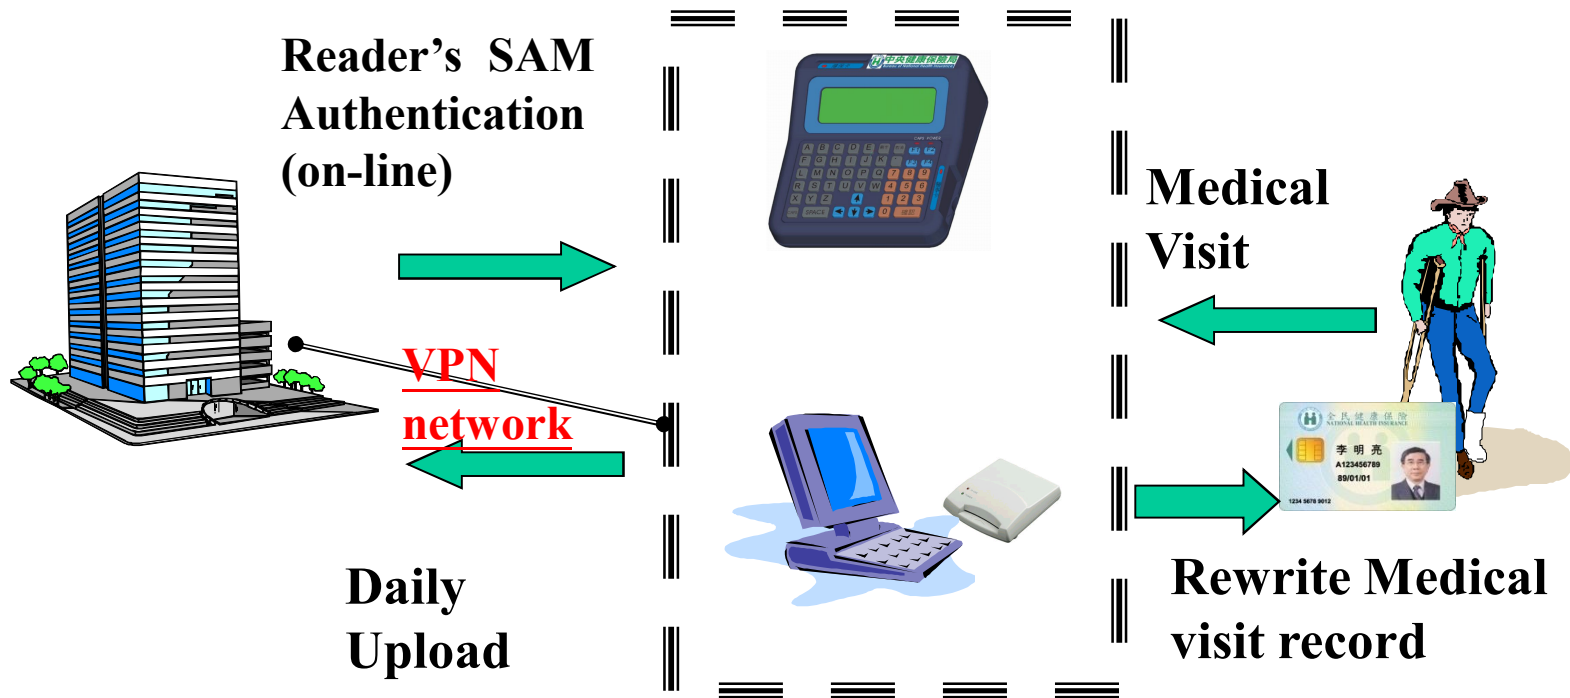

Name
ID number
Date of birth
**Photograph (voluntary, but
90% attached)**

Smart Card Data flow

IDC

Hospital

Patient

Current Operation Status(1)

- **150,000 regular new card release service per month**
- **200,000 on-line card refreshing (and status checking) e-service per day**
- **50,000 on-line SAM authentication per day**
- **1,200,000 medical visit data transmission per day**
- **5,000,000 prescription data (and CT, MRI, PET records) transmission per day**

Current Operation Status(2)

- **Keep the most recent 6 detailed medical visit records 60 prescription medicines or treatment in card → a simple but portable personal electronic medical record summary!**

Change of Management with Smart card

- Monthly monitor of medical expenditure → • Daily monitor of utilization
- Eligibility check possible annually → • Instant checkup of patient's eligibility
- Data exchange with CDC on the project basis → • Daily monitor of communicable disease
 - SARS (2003), H1N1
 - Inbound traveler

Future Perspectives in Technology

- **Provide more add-on values through network services**
- **Provide better quality information**
- **Information Security is still a issue**
- **Continue to do high utilization case management and assistance**
- **EMR (Electronic Medical Record)**
- **Cloud computing ?**

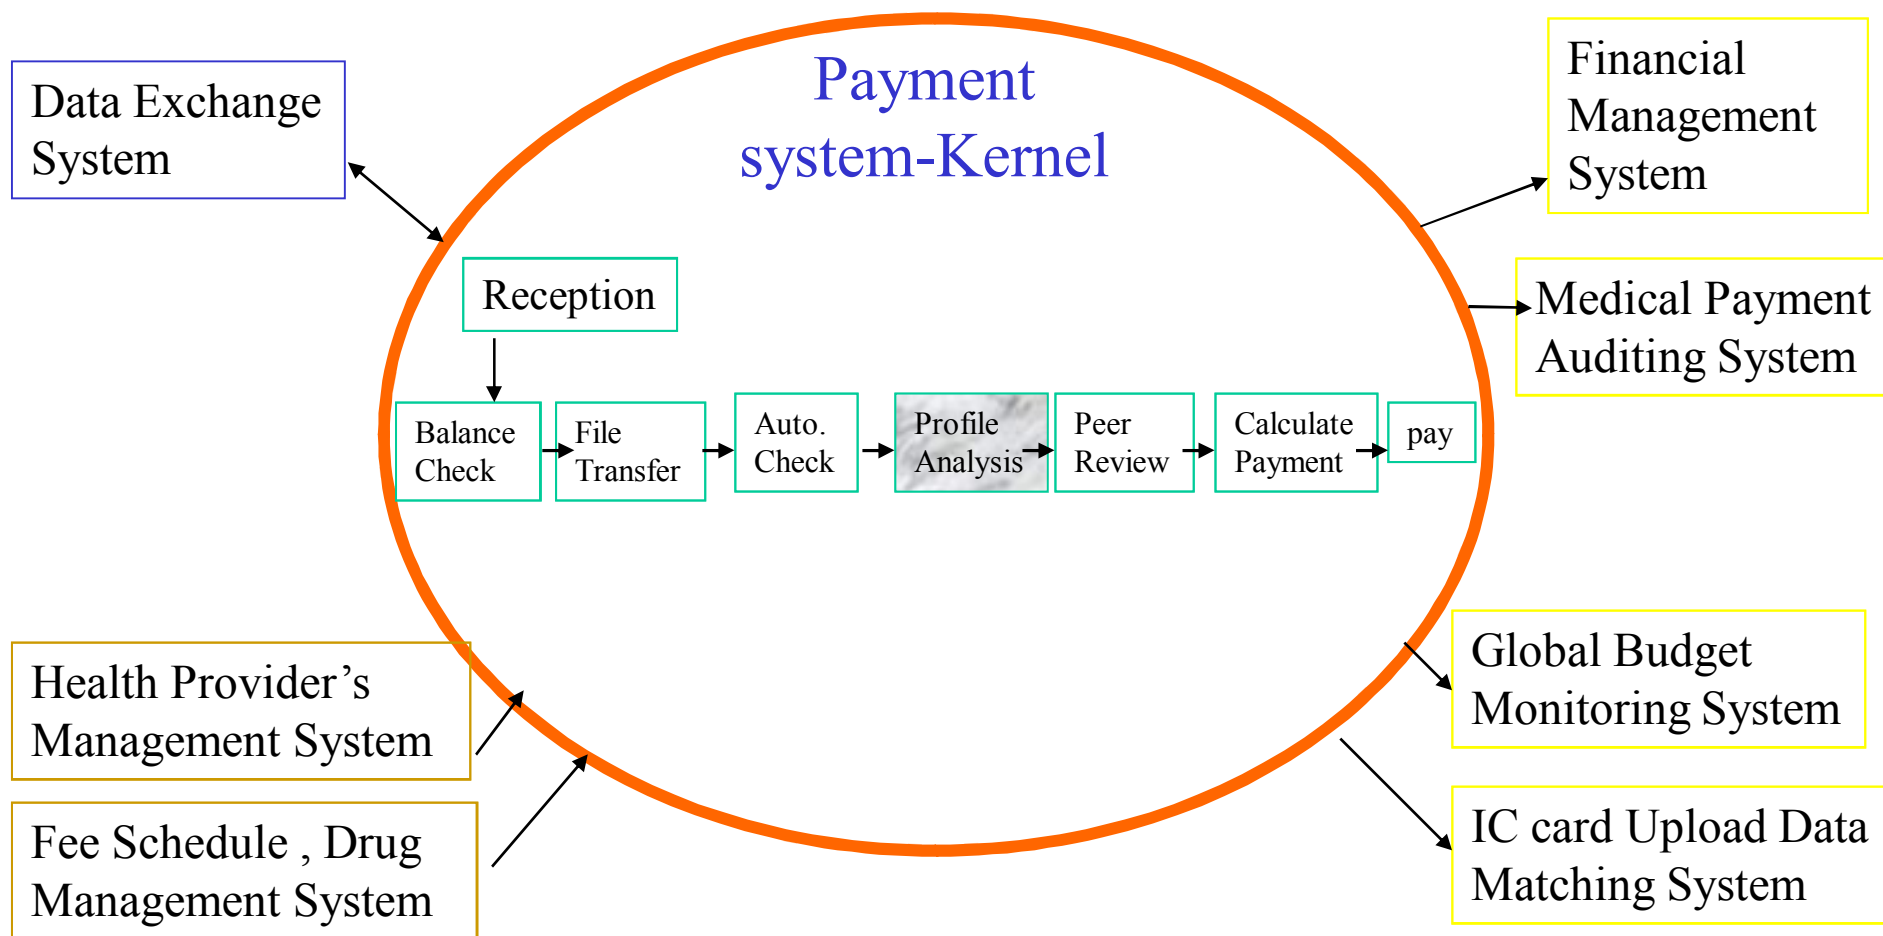

*Thank you
for your kind attention!*

Appendices

Medical Data Content

- **Total File** : One Record per hospital per month
- **Detail File** : One Record per patient per visit
- **Order File** : contains all the drug or treatment information regarding each patient's medical visit

Medical Payment System

Content of IC Card

- **Basic data:** name, ID, birth date, serial #
- **Insurance data:** hospital ID, inpatient /outpatient expenditure, co-payments, exemption status, medical visit data
- **Medical care data:** major examinations, chronic disease/outpatient prescriptions, allergic medicines
- **Public health data:** childhood vaccination records, organ donation, DNR
