October 22 - 25, 2012 / Inbal Hotel, Jerusalem, Israel

Trends in information insecurity

Jan Timmermans
Ministry of the Interior
and Kingdom Relations

ICA 46th Conference
October 22 - 25, 2012 / Inbal Hotel, Jerusalem, Israel

Trends in information insecurity

- The Diginotar Case: Targeting the source
- Citadel/Dorifel: The ultimate tool
- Hacking and Open source communities
- Cry Wolf; consequences of Social Media Use
- Waiting at the waterhole: targetted hacks
- Ransomware, pay or be destroyed

2

Trends in information insecurity

- No one is safe!
- We seem to be one step behind and have to become better in ways of mitigation if something happens
- Should we attack back?
- Government has to play a role in better international organisation, many jurisdictions
- ISP's should perhaps have a more prominent role
- The relation with media in case of a crisis is very important.
- Could there be a relation between sophisticated hacks and the rising unemployment of young people ;-)
