- An operation between emergency and long-term strategy
- Despite the prioritization, constant pressure / number of requests
- Establishment of a permanence with the "export box"
- Export crisis cells
  - Developed for HPAI and ASF
  - Demonstrate all the benefits of pooling State/professional actions with:
    - Information sharing, usable with importers / third countries
    - Production of documents adapted to field needs
    - Seeking to diversify outlets
    - Preparing for crisis exits

#### **Crisis strategy: zoning, compartmentalization**

- Sub-populations with special health status
- For the purposes of disease risk management, with particular application and relevance to international trade

Zoning	Compartmentalization
defined primarily on a	defined primarily by
geographical basis	management and
(using natural, artificial or	husbandry practices
legal boundaries)	related to biosecurity
