Background

- Transboundary diseases are the major pig diseases having affected pig production system in Asia.
- Porcine Reproductive and Respiratory Syndrome (PRRS) is the disease with the big economic impact for pork industry.
- Control and elimination of PRRS is crucial.

Background

- Regional workshops on swine diseases in 2014 suggested WOAHA Reference Centres support building capacity on laboratory diagnosis and disease control measures.
- WOAHA and China Animal Disease Control Center(CADC) organized laboratory hands-on trainings since 2015.
- **WOAHA Regional virtual training on swine diseases laboratory diagnosis will be held on 1-2 December 2022.**

Objectives of the workshop

- To share information about the current status of swine diseases (PRRS, CSF, ASF) in the region.
- To enhance diagnosis and control capacity on PRRS and other swine diseases in Asian and Pacific region.
- To strengthen network and explore potential regional swine disease collaborations mechanisms among member countries in the region.
